### *Allowable Subject Matter*

2. Claims 1-17 are allowed.
3. The following is an examiner's statement of reasons for allowance.
  - The prior art fails to teach a digital transmission system/ method of Claims 1, 2, 7, 8, 11, 13, and 15 that specifically comprises the following:
    - The instant application is deemed to be directed to a non-obvious improvement over the admitted prior art of the instant application and the invention patented in Pat. No. US 3,993,867, US 5,761,246, US 6,105,157, and US 6,442,644. The improvement comprises that -

With regard Claims 1 and 13, "a first terminating network receiving programming signals and generating a first terminating voltage with a first source impedance at a first node, said first node coupled to said first output of said first transmission line, wherein said first terminating voltage is modified in response to said programming signals while maintaining a pre-determined magnitude of said first source impedance." as recited, and

With regard Claim 11, "said first transmission line in a programmable terminating voltage having a source impedance, said programmable terminal voltage modified in response to first program signals, and a bus system coupling said CPU to said RAM, wherein said terminal voltage is modified while controlling the magnitude of said source impedance to optimize said received digital signal." as recited.

With regard Claims 2, 7, 8, and 15, the examiner's statement of reasons for allowance has been addressed in the last Office action # 20050919, dated 9/21/2005.
